

恒温水浴锅

THERMOSTATIC WATER BATH

用途特点

恒温水浴锅广泛用于干燥、浓缩、蒸馏、浸渍化学试剂及生物制品，可生物遗传、病毒、水产、环保、医药、卫生、生化实验室、科研教学的必备工具。

- 外壳优质304米粒不锈钢模具冲压而成
- 内胆为优质304不锈钢模具冲压而成
- 保温为整体发泡而成，保温性能极佳

Characteristics

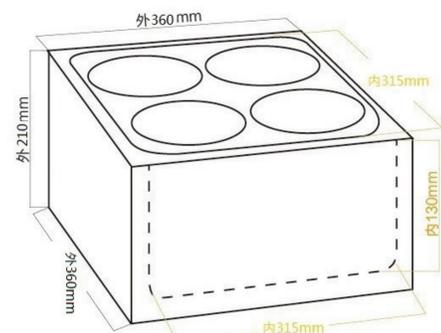

Thermostatic Water Bath is widely used in drying, concentrating, distilling, dipping chemical reagents and biological products, it is an essential tool for biological genetics, virus, aquatic products, environmental protection, medicine, hygiene, biochemistry laboratory, scientific research and teaching.

- The shell is made of high quality 304 stainless steel mould through stamping
- The inner is made of high quality 304 stainless steel mould through stamping
- The insulation layer is made of the whole foaming and insulation performance is excellent

整体发泡，一次成型
Overall foaming, one-time molding
